Workplace Toxicity

The Silent Pandemic to Employee Productivity, Well-being and Morale

Creating a positive working environment is more than simply a policy aspect; it is the foundation for making an employee feel equitable in what they contribute and get from the organisation, and that the dynamic is fair.

REVATHI HARIHARAN
COUNSELING PSYCHOLOGIST &
INTERNATIONAL CAREER COACH

Helping Behaviour at Work

How Much is Too Much

While givers may excel in their careers, they are also most likely to be the least successful. How does Grant explain this paradox that has been observed in an array of professions from engineering to sales to medicine? Apparently, the kind of giver you are matters.

ARUNA SANKARANARAYANAN
PSYCHOLOGIST & WRITER

STEP 2 OF 7

Cherish extraordinary desires

Setting more demanding and higher objectives for yourself is a fantastic beginning point. If you achieve them, you will acquire negotiating power. It's like a bright 1000-volt bulb, visible from a long distance. No amount of corporate politics can prevent the illumination. If your organisation does not recognise the illumination, others will. The world is a huge place, and there is no shortage of space for achievers.

SREEDHER KADAMBI

PRINCIPAL CONSULTANT & MANAGING DIRECTOR
SKIL GLOBAL BUSINESS SOLUTIONS PRIVATE LIMITED

Dealing with Difficult People

More careers in organisations have been abruptly terminated, derailed, or damaged, primarily due to terrible bosses (as viewed by the subordinate) rather than the organisation itself. As a result, being able to deal with tough individuals is an essential talent for anybody aiming to be at the helm.

Empowering Women

Accelerating Gender Equality Through Economic Empowerment

The path to gender equality and economic empowerment is continuous, but each success story brings us closer to a more inclusive and wealthy India. Let us support their cause, celebrate their achievements, and work together to create a future in which every woman may prosper.

Adapting Pedagogy for The Digital Age

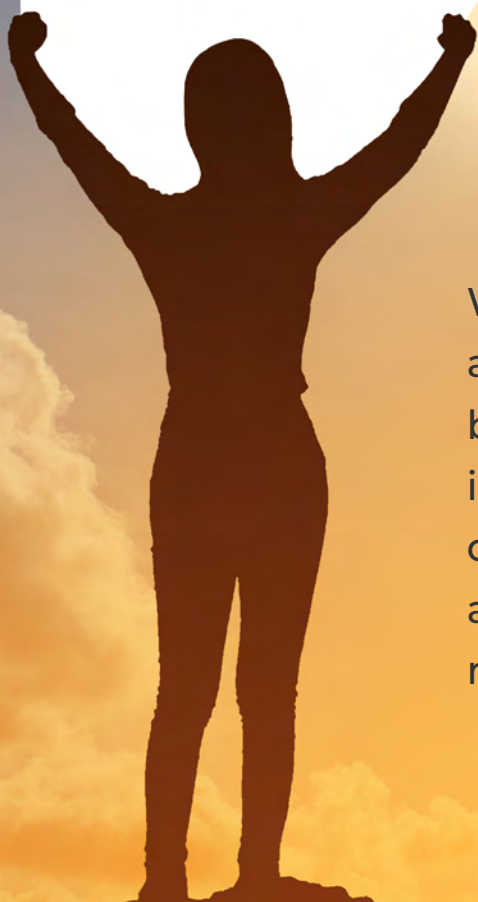

Critical thinking, analytical thinking, problem-solving, technical literacy, and others are among the few talents that are considered to be rapidly expanding. Curiosity, lifelong learning, resilience, adaptability, and agility are said to be rising more rapidly.

THE POWER OF SMALL WINS

We picture summiting huge peaks, accomplishing key milestones, and basking in the glory of victory. However, in the pursuit of these high goals, the deep influence of apparently little achievements - the quiet power of modest wins - is frequently overlooked.

PREETHI DANIELN

HEAD OF PARTNERSHIPS – I'M SAFE
WOMEN EMPOWERMENT EVANGELIST – YOU ARE LOVED

From Conventional to Transformational

The changing nature of learning

MRIDULA MURTHY
FOUNDER OF INSPIRING LEARNERS

Education in India has evolved not only in recent years, but also in response to historical changes. Since achieving independence in 1947, India's education system has witnessed amazing changes. The move from a colonial heritage to a diversified ecosystem aiming for equality and excellence exemplifies the dynamic character of education. The recent introduction of the New Education Policy (NEP) has influenced the future of education by emphasising creativity, critical thinking, and overall growth.

REENGINEERING Educational Pedagogy

We live in a knowledge society, which requires students to understand technology, skills, and information in order to be successful in life and at business. Information is available everywhere, but students must be knowledgeable enough to distinguish between which information is correct, which is propagated for propagandist objectives, and which is a false story.

UMAYAL THIAGARAJAN
EARLY CHILDHOOD EDUCATOR & AUTHOR
