DIGITAL CAMPUS NAVIGATING

THE E-REVOLUTION IN UNIVERSITY GOVERNANCE

As the world's higher education scene becomes more fast-paced. Indian Universities are starting on a revolutionary journey to digitalization. The Digital Campus era in Indian universities is distinguished by the seamless integration of technology with old bureaucratic systems. From admissions to exams, student services to research partnerships, e-governance is transforming the environment by promoting efficiency, openness, and accessibility.

EMOTIONAL INTELLIGENCE AND LEADERSHIP

Leaders with high emotional intelligence are better at developing good connections, motivating their staff, communicating effectively, and making informed judgments. EI not only improves personal connections but also contributes to society.

NEED MORE GROUND BREAKING INNOVATORS

Our brilliant people deciding to play it safe by developing tweaked, more cost-effective versions of technological applications already introduced elsewhere would not move the needle on innovation nor provide significant momentum to signature national missions such as 'Digital India', 'Make in India', and so on.

GAME-BASED PEDAGOGY FOR HIGHER EDUCATION

Do you remember playing number-based games in school? There were several simple activities meant to keep children interested while teaching them fundamental concepts. Some nursery rhymes were written to teach numbers and other basic principles about life. Primary school was entertaining. However, the fun factor gradually faded and was replaced by rote learning, in which youngsters were forced to write pages of material every day.

NIPPING NEGATIVITY IN

THE BUD

Because humans tend to recall unpleasant news over good news, one person’s pessimism may spread. Negativity inside a company, from petty fighting to gossip to malicious rumors, is not only poisonous but also has the potential to spread. So, before things go too bad or too late, it’s best to reduce negativity early on.

STRATEGIC LISTENING

THE KEY TO EXECUTIVE EXCELLENCE

While taking a walk in the park, I look at every tree with awe, wondering at the power the seed brought with it to enable it to grow into a size that is beyond imagination. Similarly, both friend and foe mind sow the 'seed' every day; it is we who choose which ones to nurture. Once the seeds grow into a big redwood tree, it is nearly impossible to axe it, be it the tree of strength or weakness.

WHY EMOTIONS MATTER AT THE WORKPLACE?

Consider how a little circumstance like emotional outburst may have a cascading effect on the individual, team, and company. What would be the cumulative effect of all workers' emotional reactions at work? That is why, in response to changing market needs, many firms are evaluating their strategy and considering incorporating emotional intelligence into the workplace environment.

BE DISCONTENT

If you think of becoming a CEO one day, you will become one; it is just a matter of time. But thought alone doesn't help. To become a CEO, you must be 'discontent' with what you are today, what you have today, and put up what it takes to become a CEO one fine day. There are no accidents in any journey, everything is by design. Your contentment level lays foundation for your accomplishments; what you hold yourself accountable for, lays foundation for your position.

ARTIFICIAL INTELLIGENCE TOOLS IN TEACHING AND LEARNING PROCESS

AI in education is the application of intelligent systems and algorithms to improve different elements of teaching and learning, educational administration, and student assistance. The idea is to use AI to improve educational results, tailor learning experiences, and streamline administrative processes.

EMPOWERING THE WORKFORCE

THE VITAL ROLE OF UPSKILLING IN AI AND GENERATIVE AI TOOLS

In order to improve technology, we must practice and support ethical AI. This includes creating and using AI in a fair, transparent, and responsible manner, especially in the absence of governmental mandates. Ethical AI guarantees that AI serves everyone and that its implementations do not perpetuate prejudices or inequities.

SUPRIYA BHUWALKA
FOUNDER - CODING AND MORE

Call for Paper

ICT Academy is an initiative of Government of India in collaboration with the State Governments and the industries (recommended by NITI Aayog). ICT Academy is a not-for-profit society, the first of its kind pioneer venture under the public private partnership model that endeavours to train the higher education teachers and students thereby developing the next generation teachers and industry ready students. Visit: www.ictacademy.in for more details.

ICTACT Journals – an international publication of ICT Academy are published quarterly
